Online Advertising benefits

With a database of over 10 million job seeker profiles and 450,000 corporate clients across Asia Pacific, JobsDB Online Advertising Program is a unique channel with performance tracking capability that enables advertisers to promote products and services to a highly targeted group of audience in a rapidly growing market.

Interactive Link, Advertorial and Email Campaign combine the benefits of broadcast and print advertising with virtually no limitation, providing an efficient and cost-effective promotional channel for advertisers to attract potential customers anywhere and anytime.

Our focus is the Internet and we find many clients underestimate the value of the online environment. There are many unforeseen and unrecognized benefits in using online advertising strategies such as:

- *Target Specific* Advertisements can be posted on specifically defined audience and highly targeted basis.
- *Time to Market* Online advertisements are faster to design and create therefore it is much quicker to reach the market than traditional advertisements.
- *Extensive Coverage* Advertisements can be posted across countries and regions, which allows your promotion to penetrate the global market.
- *Cost-Effective* With the same advertising and promotion budget, Internet advertising and promotions can be posted for longer periods and across a wider and more varied spectrum, when compared to traditional media.
- *Instant Response* Advertiser can trace response and online behavior by using various feedback or response tools (e.g. tracking reports, online forms and questionnaires, etc.)

BANNER
